❖ Experience

- **2022:** Full Stack Developer, Internship at XpertBot from Apr 2022 till Sep 2022.
I worked full Website about Basketball(News&Teams) and Admin Dashboard + Login&Register (Admin&User) and I used of course API by Laravel for Backend and Vuejs for Frontend.

❖ Projects

- **E-commerce Flutter app (Flower shop)**, this app is online shop + awesome design + best performance, this app includes Login®ister + Home page + cart for display all the products selected, and of course you can remove any product from the list. for more details, you can check the source code on Github.

A Project Link on GitHub: <https://github.com/Hackergy-X/E-commerce-flutter-app>

- **BasketBall(News&Teams) Website**, it is Full Stack Project about everything related to basketball, User Pages + Admin Dashboard, and of course SignIn&SignUp&SignOut for (Users,Admins), and for more details, you can see the source code from GitHub.

A Project Link on GitHub: <https://github.com/XpertBotTeam/BasketBall-Project>

- **Electrical Store app(flutter)**, This store app to display all products about (Mobiles, headsets, Tv, vr, Airpod, etc..) + Details page, when you click on the each product, Details page include all information about this product like (Image, title, price, Des), for more details, you can check the source code on the github.

A Project Link on GitHub: https://github.com/Hackergy-X/Electrical_store_app

- **Movies Website 2022**, Display all the movies with different categories + Awesome Design + Responsive for all platforms, I created this website by HTML&CSS&Javascript, for more details, you can check the source code on github.

A Project Link on GitHub: <https://github.com/Hackergy-X/Movies-Website-2022>

- **Portfolio Website** Using Reactjs, best portfolio website to display all the information with pretty design + responsive in all platforms, and with contact page, I make this website using Reactjs + Expressjs, for more details, you can check the source code on github

A Project Link on GitHub: <https://github.com/Hackergy-X/Responsive-Portfolio-Website-Using-Reactjs>

- **Image Editor Website**, best website to edit image about filters and after edited you can download edited image + reset button to reset all filters on image, I made this website using HTML&CSS&Javascript, for more details, you can check my source code on github.

A Project Link on GitHub: <https://github.com/Hackergy-X/Image-Editor-Using-Javascript>

- **Internet companies website**, this website for companies that distribute internet to everyone, we have Login&Register + Admin Dashboard for show/Edit/Delete Users Account and we have feedback page to show all the message from users, and more, I made this website using HTML&CSS&PHP&SQL Server for more details, you can check my source code on github.

A Project Link on GitHub: <https://github.com/Hackergy-X/Internet-Company-Website-PHP-CSS-SQL->

- **Adidas Website**, awesome design + responsive website, I made this website using HTML&CSS, for more details, you can check my source code on github.

A Project Link on GitHub: <https://github.com/Hackergy-X/Glass-Website-Adidas>

- **IPhone 13 Pro Max website**, a great website to display iPhone 13 Pro Max for many colors, you can choose any colors and then it will change the shape of the website for the color you have chosen a beautiful and wonderful website, I made this website using HTML&CSS&Javascript, for more details, you can check my source code on github.

A Project Link on GitHub: <https://github.com/Hackergy-X/IPHONE-13-Pro-Max-Website>

- **Articles Website**, awesome website + responsive in all platforms, I made this website using Nodejs Fr: Expressjs, for more details, you can check my source code on github.

A Project Link on GitHub: https://github.com/Hackergy-X/Articles-Project_Nodejs-ExpressJs-

- **Flutter App Login&Register + Welcome page**, awesome design, for more details, you check the source code on github.

A Project Link on GitHub: https://github.com/Hackergy-X/Flutter_app-Login_Signup_Welcome-

- **Calculator Flutter App**, best calculator using flutter + awesome design + best performance, for more details, you check the source code on github.

A Project Link on GitHub: https://github.com/Hackergy-X/Calculator_App_Flutter
